Patrick opened the meeting by discussing a Hewlett Packard printer standard update. HP M608n will be the new printer. Patrick went over the specifications with the committee members. Javier made a motion to approve this printer as the new standard and Nick Real seconded. The new standard was approved. Patrick went on to inform the committee that the HP M606dm was discontinued, to be replaced with the M612dn. He reviewed the specs of this model as well. Javier made a motion to approve as new standard and Andrew Maz seconded. Motion was approved.

Patrick moved on to discuss docking station options. Hewlett Packard has one with a USB-C dock, G5, for $200.00. The committee discussed all options. It would make sense for Faculty and possibly Management in the new working environment but most likely not work for Classified. We will be testing it out with MacBook's too. We will be looking at other options as well.

Patrick asked if there were any questions or comments. He then asked if there were any items from the floor. There were none.
