

OFFICE OF THE PRESIDENT/SUPERINTENDENT
PRESIDENT'S CAMPUS UPDATES

July 26, 2019

Dear Colleagues,

In my recent campus update, I overlooked including the hard work and collaboration of the Math Department in relation to the success of our Stats in Motion program. Allow me to take this time to properly recognize our Math faculty and staff, specifically Angie Conley for her work and vision to lead and develop this innovative program. It takes incredible dedication and passion to make Stats in Motion successful. I want to acknowledge that Angie has put so much of her personal and professional time and energy into nurturing and maturing the program so that our students can be successful. I would also like to acknowledge Math Instructor Matt Montegary and all of the tutors who help our students succeed.

Stats in Motion is an amazing collaboration between the Math and Athletic Departments that offers a creative way to teach students math concepts. While student-athletes are playing their respective sports, they are also learning how to apply math to the game. The data is clear that Stats in Motion is making a big impact on student success.

Thank you to the math faculty, tutors, and coaches who are working hard to make Stats in Motion successful. Lastly, thank you to Rick Miranda and Shawna Baskette for your continued support of the program.

Have a great weekend!

Thanks,
Jose

Jose Fierro, D.V.M., Ph.D.
