

If you were
boosted before
September 2022,
you did not receive
the newer version
& your immunity
could be decreased.

Omicron is
responsible
for 90% of
COVID-19 cases
& is predicted to
spread during
the fall & winter
seasons.

BOOOOST YOUR IMMUNITY

with the NEW reformulated COVID-19 vaccine,
released Fall 2022.

This bivalent formula targets the BA.4 & BA.5 versions
of the omicron variant.
