

SUPERHERO

ACCESSIBILITY: UNIVERSAL DESIGN

Veronica Herrera joined the Counseling Department over 15 years ago. She enjoys serving students by providing student development opportunities in and out of the classroom. She was recently appointed as one of the Distance Education Coordinators to provide professional development support in Accessibility. Veronica views the training process as a collaboration where she sees herself as a partner and coach. It is her goal to create training that provides a supportive learning environment, so that faculty and staff feel comfortable approaching her for assistance throughout the process. She fundamentally believes that when we support our faculty and staff with ongoing quality professional development opportunities, the better served our students will be.
