

Student Success Definition

Student Health Services

Our mission is to strengthen student learning and student success by providing quality health care services to a multi-cultural population through the promotion of health education, prevention and wellness. Our systematic programming efforts are grounded in research, empirical evidence, national guidelines, and industry standards with a specific focus on risk behaviors, reproductive health & communicable diseases, nutrition, health promotion, and special populations.

Student Health Programs Foster Student Success and Advocates for a Healthy Campus by:

- Defining & updating its mission, aligning services with student needs & healthcare trends
- Following standards of practice, including privacy
- Creating affordable & equitable care that is inclusive, culturally competent, accessible & ethical
- Promoting engagement with students, faculty, staff, & community partners
- Educating students about accountability for their health choices and rights and responsibilities
- Emphasizing & promoting wellness & prevention to enhance learning
