We have heard and read a lot about The Founding Fathers, that is, American founding fathers but what about the founding mothers. Were there women who also played significant role in birthing this government, this republic, this United States of America? The answer is a resounding yes. The purpose of this presentation is to introduce us to some of these courageous women/ mothers of this Constitutional Federal Republic of the United States of America. I think this fits this year's theme of "providing healing, promoting hope." It brings healing from the past mistreatment and the lack of recognition that women have endured in this country. And it brings hope to know that the future is bright for women as they continue to be recognized for their invaluable contributions to the efforts to "form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity ..."
