

2025 Women's History Month

Movie: Hidden Figures

March 26 | 11 a.m. - 1 p.m. | LC 155

Hidden Figures is a biographical drama based on a book by Margot Lee Shetterly. Set in the 1950s and 1960s, it follows the true story of three African-American women who worked for NASA as 'human computers' at the Langley Research Centre. As a result of their mathematical and engineering skills, Katherine Johnson (Taraji P. Henson), Dorothy Vaughan (Octavia Spencer) and Mary Jackson (Janelle Monae) participate in the early days of the program to send American astronauts into space.

In the racist climate of the times, the three women are forced to work in the segregated West Area Computers Division. As women and African-Americans, they face continued discrimination. Despite producing high-quality work, they're rejected for supervisory roles and they also receive dismissive and disparaging responses from colleagues.

If disability accommodations (e.g., communications access, alternate formats) are needed to participate fully in these events, please contact accommodationsrequest@cerritos.edu within seven school days in advance.
